

Sorghum ^{ID}

Sorghum economy in European farms

Marc VARCHAVSKY – Manager of economic advice – CERFRANCE

PRESENTATION OF THE STUDIES

- The aim is to compare the gross margin of grain sorghum with other crops.
- Unfortunately, often the sorghum is compared to other crop but not in the same conditions.
- In this study, we tried to have a common method to calculate the gross margin of different crops and in different countries.

PRESENTATION OF THE STUDIES

4 different countries :

- Ukraine,
- Romania,
- Italy,
- France.

PRESENTATION OF THE STUDIES

- The method :
 - Choice of a geographical region in the country
 - Technical conditions for the agro-climatic potential of the region and of the hybrids
 - Multi year gross margin calculation to take in consideration the yield and price variability.
- Each country will present their price and yield.
